TROCA^{v2}

60" DC INVERTER FAN

LAST SPEED
MEMORY

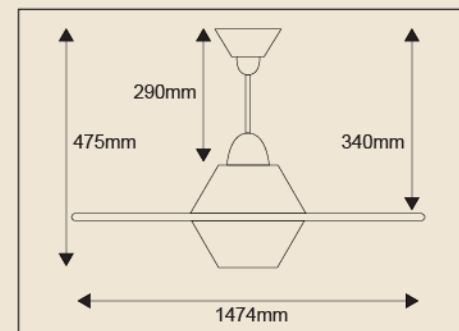

About Troca v2

Troca DC motor technology is one of our DC FAN products.

Dc fan are up to 50% more energy efficient when compared to an AC fan. Our Troca promote large amount of airflow with minimal noise. Troca also lower your energy costs and help you save money in long run. It can lower your energy consumption by up 50%. In that sense, it's also environment friendly as it reduces the household's carbon footprint.

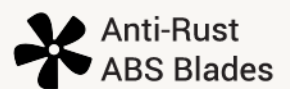

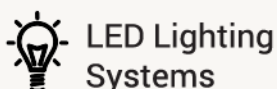

Troca provides functional illumination. You no longer need to put additional lights in a room. On its own, it can already light up a room. Although Troca doesn't change the room temperature, the air movement makes you feel cooler.

The breeze will help in speeding up the natural evaporation of perspiration on the skin. It makes our natural cooling mechanism more efficient. Troca measurement is 58 inch so it is suitable for large spaces.

SPECIFICATION

TITAN

80" ULTRA LARGE INVERTER FAN

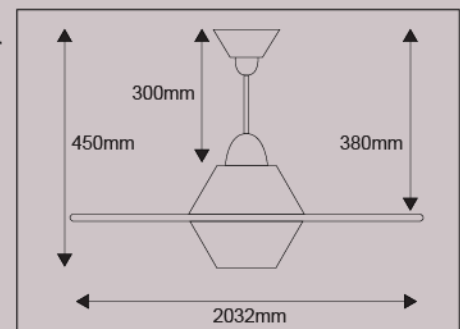

About Titan

Extra Large, Extra wind flow & Extra Coverage. Mava Titan will definitely be the ideal choice if one requires the extraordinary size that could cover a much more larger coverage than the standard fan.

The 80 inches blades are worry free in its durability, it is made out of high-grade aluminium. It has high strength and excellent corrosion resistance.

It has an enhanced DC motor that produces spectacular performance for such a large ceiling fan. With as many as 8 high-grade aluminium blades and enhanced DC motor, it is possible for us to produce a great wind flow with such large blades without losing any balance and affecting any performances. It comes with auto timer 1/2/4/8 Hours and reverse function.

About Estilo Pro

The evolution of Estilo, Estilo Pro. Due to the high demand for its design on Estilo and feed back for an upgrade, the Mava Development team successfully upgrade it into a whole new specification while maintaining the design and the powerful wind force.

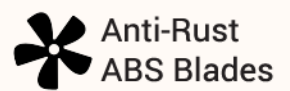

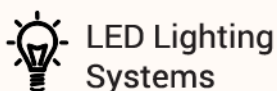

It now comes with a Inverter DC motor that will be saving more electricity than many ceiling fan. It is also more durable and have a longer lifespan. Comes along with the extra bright LED lighting with 3 colors option.

Estilo Pro adopted the Mava latest technology, Mava Intelligent Autospeedz sensor. This sensor are an intelligent sensor that detects the temperature of a space and consistantly changing the fan speed accordingly.

SPECIFICATION

BOBELO V2

52" DC CEILING FAN WITH REMOTE CONTROL

LAST SPEED
MEMORY

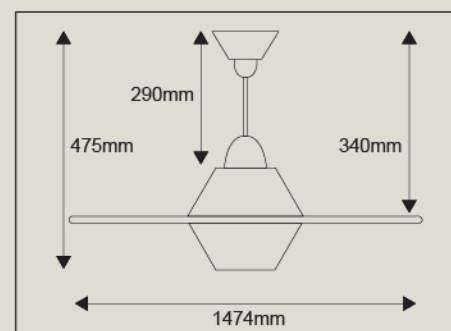

About Bobelo v2

For your "everywhere" fan needs. Mava BOBELO is powered by an energy efficient Inverter DC motor, which is capable of up to 6 different speeds to control the amount of airflow in a room. A frosted acrylic ABS cover helps to diffuse the energy-efficient Led lighting housed within and creates a warm, welcoming environment to interior living spaces.

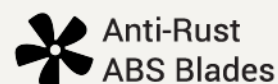

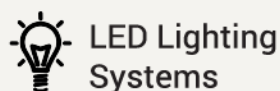

The efficient 6-speed DC motor of Bobelo offers incredible airflow with every watt. Our Bobelo ceiling fan also keep energy bills low thanks to the DC motor technology and variable setting. BOBELO uses 50% less energy for the same airflow as a conventional AC ceiling fan.

Being "brushless" it should also be quieter and less prone to the buzzes that can appear on cheaper AC ceiling fans and also quicker starting. So, Mava bobelo is one more choice for everyone.

SPECIFICATION

FAN WIDTH	: 52"	LIGHT	: YES
NO OF BLADES	: 5	REVERSE	: YES

APIX

21" MINI CEILING FAN WITH REMOTE CONTROL

LAST SPEED
MEMORY

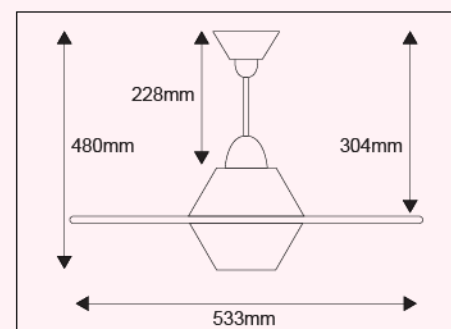

About Apix

Apix is a small yet unique and strong little ceiling fan. Regardless of its size, it is powered by an Inverter DC motor as well. This enables such a small scale fan to produce sufficient breeze with low energy consumption.

As the enhanced motor produces minimal heat while spinning at high speed, this made the motor to be more tough and durable. LED Lighting is another additional feature that accompanied along with the fan, as small spaces might not need any extra lighting anymore.

A mini ceiling fan that produces great breeze, saves energy, is durable and has LED lighting.
